Dear Sir:

Please be advised that I have received Patent number #6612812-B-1, dated September 2, 2003. Semiautomatic electronic system for sensing and increasing liquid in a contained vessel to a predetermined level, i.e. (automatic swimming pool filler).

I wish to compliment you and say that I am very happy with the patent that you drafted, filed, defended and secured for me. This patent represents progress in the 21st century.

I feel that you handled by patent well and helped me include items that I feel are needed to protect it from infringement. I would recommend you and your service to anyone needing advise or a patent. I look forward to working with you again, as I have more patents.

Thank you,

Wesley R. Gard
